DESCRIPTION

The **62074** Light Emitting Diodes are designed to interface with multimode fibers from 50/125 to 200/300 microns. These LED's convert electrical current into optical power that can be used in fiber optic communication. This series provides high irradiance and is mounted on a TO-46 header with metal protective cap. Available binned to customer specifications and/or screened to MIL-PRF-19500.

ABSOLUTE MAXIMUM RATINGS 25°C FREE AIR TEMPERATURE UNLESS NOTED

Storage Temperature.....	-55°C to +150°C
Operating Temperature.....	-40°C to +125°C
Reverse Voltage(at 25°C case temperature)	1Vdc
Forward Current-Continuous.....(See note 1).....	100mA
Soldering Temperature (1/16 inch from case for 10 seconds).....(See note 2)	240°C
Transmission Rate at 100mA I _F	10Mbits/s

NOTES:

1. Derate linearly to 125°C free-air temperature at the rate of 1.0 mA/°C.
2. RMA flux is recommended.
